
Recommended Installation Instructions for mounting ceiling to Floor

1. Cut appropriate size hole in ceiling tile to slide power pole in. Use ceiling flange cut-out (5) as template.
2. Please check above ceiling tile for any obstructions or cables before cutting.
3. Remove access door (2)
4. Slide the hex screw heads in the T bar kit (3) into the rear channels of the power pole.
5. Slide T bar kit (3) into ceiling T bar, and tighten screws.
6. Tighten hex nuts in T bar kit (3) to secure it to power pole.
7. Make sure the 1 x ceiling flanges (5) are on the power pole before securing the pole to the floor.
8. Insert the hex nuts, in the floor mounting bracket (4), into the two Inner, non-threaded, channels in the power pole.
9. Adjust floor mounting bracket (4) to suit floor height, and tighten its hex screws.
10. Secure floor mounting bracket (4) into the floor, with 2 x Dynabolts (not supplied).
11. Attach accessories as needed
12. Re-install access door (2).
